**How do you collaborate securely?**

## Russia/Ukraine | Status of the Conflict as of 28 Feb

As of 28 Feb, Russian (RT) has been "forced" to focus on securing Kyiv and the Dnipro River while the U.S. consolidated gains in Kherson and reinforced defenses in Donetsk to protect its

Video Ports / Audio	HDMI 2.0, 2x TBT3 (DP 1.4 for discrete, DP 1.2 for integrated Graphics), Dolby Atmos Speaker System	HDMI 2.1, 2x TBT4 (DP 1.4) Dolby Atmos Speaker System
Wireless Communication	WLAN - WiFi 6 (802.11AX) Harrison Peak	WiFi 6E WWAN: CAT4 PRC only and CAT20 WW
Biometric / Security	Touch FPR, IR Camera, ThinkShutter RGB&IR, dTPM 2.0	Touch FPR, IR Camera, camera shutter RGB&IR, dTPM 2.0, 12mm nano k-lock

**There were lots more**  
But I decided to stop googling  
'sensitive document leaks'

# So what is the solution?

- In-browser redaction?
  - Unreliable – outsourcing security to the thief
- Hand your keys to a third party?
  - Perhaps works, but do you really want that?
- No more sharing?

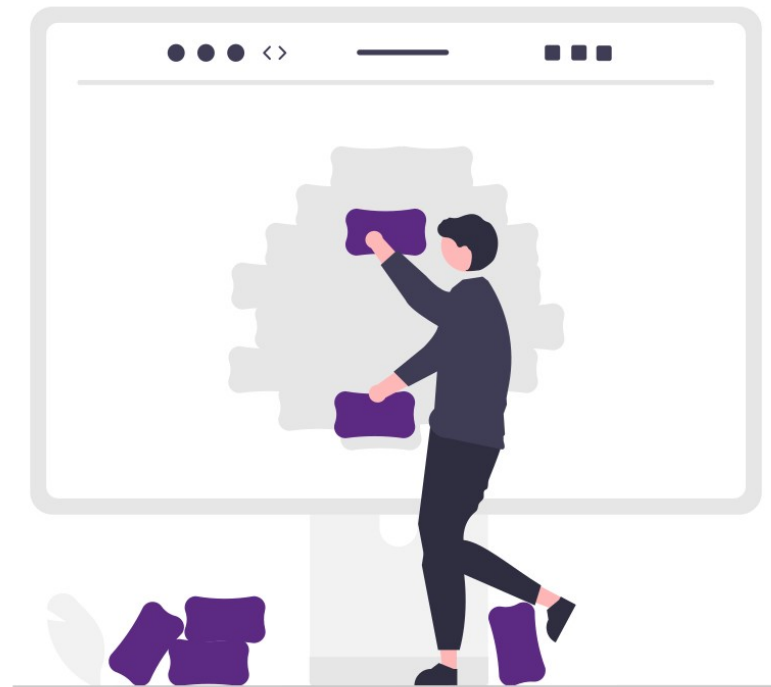

**What if you knew you  
would be caught  
immediately?**

**What if you knew you  
would be caught  
immediately?**

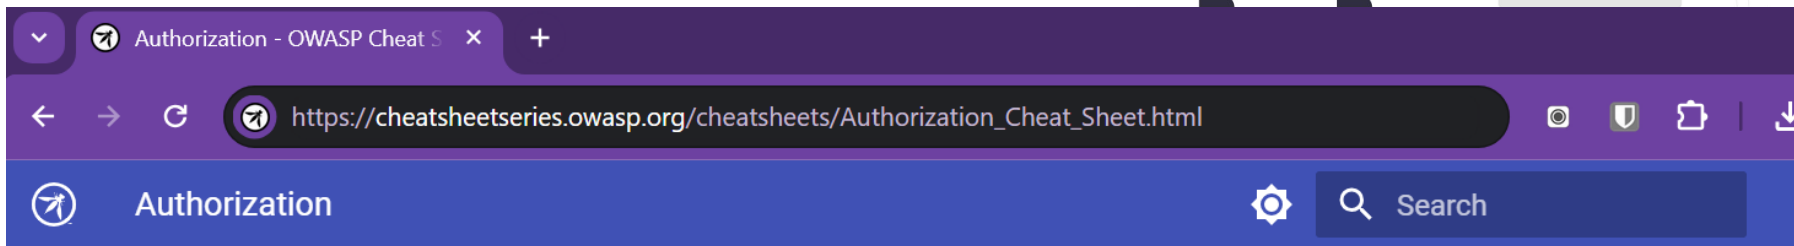

# In-browser redaction, orr?

- This is **not** in-browser redaction
- Collabora Online only shares pre-rendered pixels
- Only visible sections of the document are sent
- The document **always** stays behind whatever security measures you choose, such as firewalls, VPNs and reverse proxys

# Server-enforced security

- Best practice, compliant security

## Verify that Authorization Checks are Performed in the Right Location

Developers must never rely on client-side access control checks. While such checks may be permissible for improving the user experience, they should never be the decisive factor in granting or denying access to a resource; client-side logic is often easy to bypass. Access control checks must be performed server-side, at the gateway, or using serverless function (see [OWASP ASVS 4.0.3, V1.4.1 and V4.1.1](#))

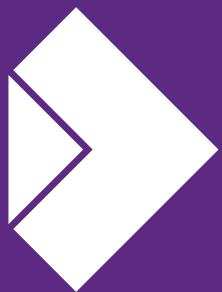

# **Collabora Productivity's top secret plan to secretly take over the world**

**Step 1 - create the most-secure, feature-  
filled, user-friendly office productivity suite  
available**

**Step 2 - drink champagne**

it's - a - secret

Collabora  
Online

# Thank you!
