

AI Assisted DeepL Translation

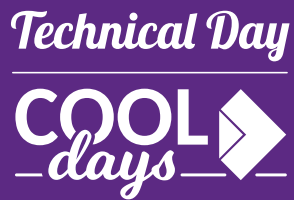

Szymon Kłos

Software Engineer

szymon.klos@collabora.com

Collabora
Online

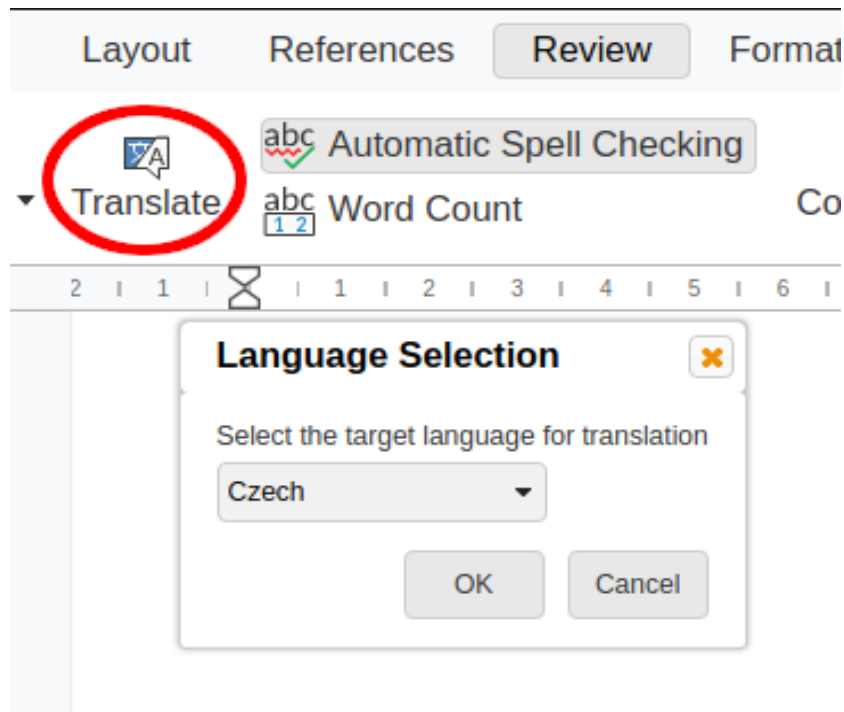

What is DeepL?

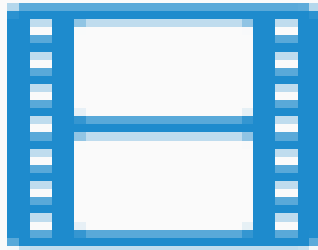

- DeepL Translator is a neural machine translation service
- According to the developers, the service uses a newer, improved architecture of neural networks, which results in a more natural sound of translations compared to competing services
- It offers a paid subscription for additional features and access to its translation application programming interface

Integration with Collabora Online

- Just select piece of text
- Click “Translate” button in “Review” tab
- Dialog appears with language selection

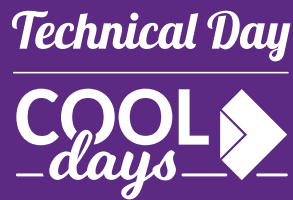

Configuration

- In coolwsd.xml
- 3 options to set: enable, URL, Auth Key

```
<deeph desc="DeepL API settings for translation service">  
  <enabled type="bool">true</enabled>  
  <api_url type="string">https://api-free.deepl.com/v2/translate</api_url>  
  <auth_key type="string">HERE PUT YOUR AUTH KEY</auth_key>  
</deeph>
```

Thank you!
