Technical Day COOL days

LibreOffice Technology

Export as in LibreOffice Writer

- We already have existing logic to export a writer document as a PDF or EPUB file

- To port these to Collabora Online requires a few modifications

Setting PDF/EPUB options

- The desktop PDF/EPUB options dialog is now exposed in online and converted to a JSDialog
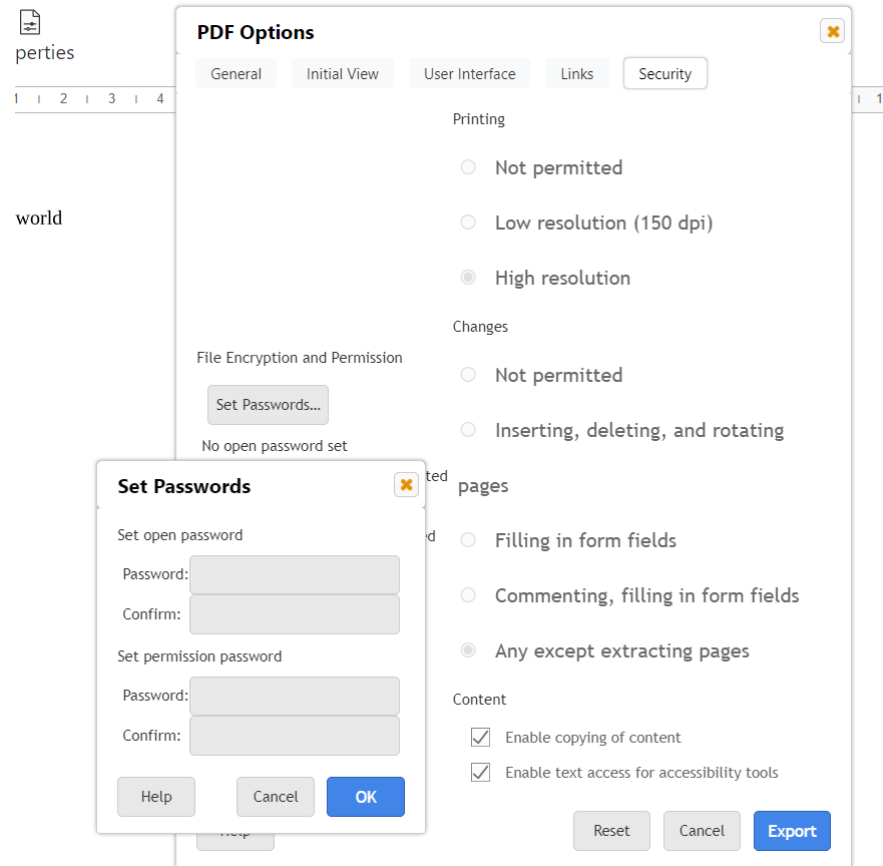

-

Saving the exported file

- The desktop uses a file selector dialog to export to

- However with online we can't use a file dialog as it's out of our domain so we instead download the file

Securing exported PDF

LibreOffice Technology

- The functionality to set permission and encryption passwords is also now available online
